 Day, Mena!

We love you!

Mom & Dad

You're a Sweetie
 Kinzlynn Jane

Love
 Mamaw & Papaw

We love you,
 K. J.

Love,
 Gigi and Papaw

Blast From the Past

Wood County Christian School was hit with a blast from the past during Spirit Week 2012, which took place during the week of January 30-February 2. The theme this year was Wildcats: Winning It Old School. The week started off with 1890s day as students dressed as pirates and cowboys. Cowboys were the more popular choice for students. The Varsity girls' team defeated Valley Wetzel on Monday night. The Varsity boys played as well, barely losing to Williamstown in an intense game. Tuesday was full of color with 1960s and 70s tie dye day. Wins for both Varsity teams on Tuesday made for a "groovy" day, as the girls beat Coshocton, and the boys beat Calvary. On Wednesday, students broke out the poodle skirts, sweater vests, and letter jackets for 1950s prep day. The students had the opportunity to go out for lunch at a variety of places, and a one o'clock dismissal finished a grand day. Disney characters walked the hallways of the school on Thursday for 90s Disney day (some of the best Disney movies were made in the 1990s). Princesses were the most common sight on Disney day. Students wore school colors and jeans on Friday's Spirit Day to show support for the teams, who played Teays Valley Friday night. There were pep rallies for both elementary and high school students on Friday complete with games, cheering, and tons of school spirit. The Varsity girls lost their game by a mere three points and the Varsity boys won their game. Elementary students were chosen each day for the best outfits and received a candy prize. Overall, Spirit Week 2012 was a great success.

Choose Anatomy!

Anyone looking for an elective for next year should consider taking anatomy. This class is very helpful for students who are interested in going into the medical field. The goal of the class is to review concepts studied in biology and to study body systems in greater depth. The class this year only has seven students. Mrs. Smith said her favorite part about teaching the class is, "the camaraderie between the students, size of the class, and the interesting subject matter." The students seem to enjoy the class because of the smaller class size and the more independent learning process. The difficulty of some of the terms makes the class a little less enjoyable at times. The students spend a lot of time using the new laptops, taking notes on videos, looking up information for a project, and using the internet for interactive games and quizzes. By the end of the year the students will have studied the body systems, investigated the 5 senses, and dissected a heart! If you have any questions about taking this class, please talk to Mrs. Smith.

-Madede Mason

Senior Serena Reynolds works in her anatomy class.
